

## **Foil XPE Insulation**

### **Features:**

1. Clean, light weight, easy to handle
2. High R-Value performance, reflecting up to 97% of radiant heat
3. Effective means of temperature control in a wide variety of application
4. Easy to install. Just roll the insulation out and staple into place
5. Waterproof and non-absorbent; Does not promote growth of mold or fungi
6. Exceptional fire safety qualities including safe fire retardant additives and non-dripping technology
7. Maximize heating system efficiency by redirecting heat toward its source

### **Applications:**

#### **Crawl Space Insulation**

Installing it in the crawl spaces will keep your home warmer in the winter and cooler in summer.

#### **Wall Insulation**

Keep your home comfortable and energy efficient by installing the foil foam products

#### **Roof Insulation**

Provides a thermal block and a first line of defense against the heat of sun entering homes attic.
